## RESTRICTION REQUIREMENT

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-34, drawn to an extruded structural member, classified in class 428, subclass 598.
- II. Claims 35-37, drawn to a wrought aluminum alloy structural member, classified in class 148, subclass 415.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because Group I is an extruded structure and Group II is a wrought structure. The microstructure, process of making, and process considerations of making intentionally increased amounts of fiber texture in each of these two types of products is different. The extruded product is made by promoting axisymmetric metal flow during extrusion and removing local geometries wherein the wrought product is rolled. The extruded article with

intentionally increased amounts of fiber texture and the wrought article with intentionally increased amounts of fiber texture are different.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
